

Dan Levy – Harvard Kennedy School
API-209: Polling results from Class 18 (Poll Everywhere)

C18 - Which of the following best characterizes your feelings towards the R2 of a regression?

 **Poll locked.** Responses not accepted.

Total Results: 63

C18 - What happens to R2 when an explanatory variable is added to a regression?

 Poll locked. Responses not accepted.

Total Results: 65

C18 - The larger the R2, the lower the likelihood that our regression suffers from omitted variable bias (OVB).
