

Levy Clip 5 Transcript

DAN LEVY: OK. Yes, something happened, right? It's OK. We'll recuperate from this one. Sarur, thank you, saving my life here while the Apple TV restarts.

STUDENT: School spending per capita.

DAN LEVY: School spending per capita. Good. I'll add it here. You can't see it but it'll come back.

All right, so is the relationship positive? The relationship is positive. Why is it positive? Because sigma square appears in the numerator. OK. So let's try-- let me do this for one second.

OK, how about the second term? Here we go. How about the second term? Uh-oh.

How about the second term? Is the relationship positive or not? In fact, I'm going to ask you, fill in the last column of this table. For the second term, is the relationship positive or negative? Riah. Riah, why don't we do something that I know you've been wanting to do for a while.

STUDENT: Oh, wow. There's a lot of pressure. This is negative.

DAN LEVY: OK. Oh.

STUDENT: You need to connect it.

DAN LEVY: Yeah. You bought this device, right? Sorry, we're having technical difficulties here. Can you count up to five? One, two, three, four, five. Let's go.

STUDENT: OK.

DAN LEVY: OK.

STUDENT: So this should be negative.

DAN LEVY: OK, why is that?
