

Levy Clip 5

[These facilitator notes provide commentary and ideas that might be helpful as you use these raw video clips with other educators.]

One reason that instructors are reluctant to use technology in the classroom is that it doesn't always work! Tech glitches can be the stuff of nightmares. But Levy keeps his cool during this challenge—he actually keeps his cool through several glitches! How does Levy balance his wish to get the technology back online with his need to keep class going? We also like this clip because of the moment at the end when Levy hands the iPad to a student so she can show her solution to the class. How does this practice contribute to both student learning and the classroom culture that Levy is trying to create?
