

Arlotta Clip 1

[These facilitator notes provide commentary and ideas that might be helpful as you use these raw video clips with other educators.]

Arlotta opens the class with a meaty recap of many of the things they have learned in the course thus far, and frames it in a way that explains why today's topic of neurodegenerative diseases can be so important to explore. It is clear to us that this class has a lot of shared scientific vocabulary that Arlotta is relying on. We also think it is a nice move to write the three dimensions of focus for today on the board, rather than just have them on a slide. Doing so will allow Arlotta to revisit them throughout the class and to continue to visually document the class' thinking.
