

Levy Clip 1

[These facilitator notes provide commentary and ideas that might be helpful as you use these raw video clips with other educators.]

Levy does a lot of impressive things efficiently in this four minute intro. He reviews key concepts from the last few classes. He discusses the learning objectives for the day. He gets everyone participating, and he uses technology to make thinking visible. He brings in emotions through his use of humor and how he constructs the poll. He discusses how much time he is spending on various topics, and why. He previews the handout, and talks about how he is differentiating the class for those with different levels of mathematical background and interest. And he does all this on an untethered iPad, allowing him to move around the room.
